GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Göttingen, Germany*
PROF. E. INGERSON *Department of Geology, University of Texas, Austin 12, Texas, U.S.A.*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*
PROF. W. A. WAHL, *Observatoriegaten 8, Helsingfors, Finland*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers on *geochemistry* should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. E. INGERSON for papers from the American continents. Papers on *cosmochemistry* should be sent to Prof. W. A. WAHL. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α , β , γ , ω , ϵ , n and vibration directions by X , Y , Z , O and E .

PERGAMON PRESS LTD.

HEADINGTON HILL HALL, OXFORD

122 EAST 55TH STREET, NEW YORK 22, N.Y.

CONTENTS

NUMBER 1

P. W. GAST: Alkali metals in stone meteorites	1
R. E. MARINGER: Ablation deposits on iron meteorites	5
H. W. FAIRBAIRN, W. H. PINSON, P. M. HURLEY and R. F. CORMIER: A comparison of the ages of coexisting biotite and muscovite in some paleozoic granite rocks	7
W. G. ERNST: The stability relations of magnesioriebeckite	10
R. D. RUSSELL and R. M. FARQUHAR: Dating galenas by means of their isotopic constitutions—II	41
E. ANDERS: The record in the meteorites—II. On the presence of aluminium-26 in meteorites and tektites	53
E. A. VINCENT and L. I. BILEFIELD: Cadmium in rocks and minerals from the Skaergaard intrusion, East Greenland	63
H. FECHTIG, W. GENTNER und J. ZÄHRINGER: Argonbestimmungen an Kalium-mineralien—VII. Diffusionsverluste von Argon in Mineralien und ihre Auswirkung auf die Kalium-Argon-Altersbestimmung	70
Book Reviews:	
Osnovy Litologii i Geokhimii Kory Vyvetrivaniya (Fundamentals of the Lithology and Geochemistry of the Weathering Zone), by K. I. Lukashev. (Reviewed by W. D. Romey)	80
Clays and Clay Minerals: Proceedings of the Sixth National Conference on Clays and Clay Minerals. Edited by Ada Swineford. (Reviewed by E. C. Jonas)	81
Meeting Announcements	82
Papers to be published in future issues	83

NUMBER 2

J. L. HORWOOD: Gamma-ray analysis of atmospheric dust samples	85
O. A. SCHAEFFER and J. ZÄHRINGER: Helium, neon and argon isotopes in some iron meteorites	94
S. R. TAYLOR: The abundance of the rare earth elements in relation to their origin	100
E. J. CATANZARO and P. W. GAST: Isotopic composition of lead in pegmatitic feldspars	113
P. G. JEFFERY: The silica and alumina content of the standard rocks G-1 and W-1	127
U. SCHINDEWOLF: Selenium and tellurium content of stony meteorites by neutron activation	134
Geochemical Notes:	
D. F. C. MORRIS and R. A. KILLICK: Silver and thallium content of rocks	139
W. S. FYFE: The possibility of d-electron coupling in olivine at high pressures	141
A. N. HAMER and E. J. ROBBINS: A search for variations in the natural abundance of uranium-235	143
A. J. ELLIS: Mordenite synthesis in a natural hydrothermal solution	145

Letter to the Editor:

E. J. OLSEN: An attempt to synthesize graphite by the dissociation of carbon-dioxide—the experiment of K. Frauenfelder	147
--	-----

Errata:

E-AN ZEN: Carbonate equilibria in the open ocean	148
Papers to be published in future issues	

NUMBER 3

W. D. EHMANN: Nickel in tektites by activation analysis	149
J. F. LOVERING, L. G. PARRY and J. C. JAEGER: Temperatures and mass losses in iron meteorites during ablation in the earth's atmosphere	156

L. G. STONHILL: The estimation of the oxidation state of pitchblende in ores	168
G. G. GOLES, R. A. FISH and E. ANDERS: The record in the meteorites—I. The former environment of stone meteorites as deduced from $NK^{40}Ar^{40}$ ages	177
W. H. R. SHAW: Studies in biogeochemistry—I. A biogeochemical periodic table. The data. Studies in biogeochemistry—II. Discussion and references	196
S. F. SINGER: Production of tritium in nuclear spallations	216
M. FORNASERI and L. GRANDI: Flame photometric determination of strontium in silicates. Strontium content of the granite G-1 and the diabase W-1	218
E. W. HEINRICH, R. A. BORUP and A. A. LEVINSON: Relationships between geology and composition of some pegmatitic monazites	222
Letter to the Editor:	
G. BAKER: Comments on the recent letter on "Moldavites and similar tektites from Georgia, U.S.A."	232
Papers to be published in future issues	234

NUMBER 4

Symposium on the Geochemistry of Petroleum:

Foreword:	235
R. G. BADER, D. W. HOOD and J. B. SMITH: Recovery of dissolved organic matter in sea-water and organic sorption by particulate material	236
CARL H. OPPENHEIMER: Bacterial activity in sediments of shallow marine bays	244
F. J. STEVENSON: Some aspects of the distribution of biochemicals in geologic environments	261
G. W. HODGSON, B. HITCHON, R. M. ELOFSON, B. L. BAKER and E. PEAKE; Petroleum pigments from Recent fresh-water sediments	272
BARTHOLOMEW NAGY: Review of the chromatographic "plate" theory with reference to fluid flow in rocks and sediments	289
I. A. BREGER: Diagenesis of metabolites and a discussion of the origin of petroleum hydrocarbons	297
E. G. BAKER: A hypothesis concerning the accumulation of sediment hydrocarbons to form crude oil	309
Papers to be published in future issues	318
